

Derek L. Robinson – Director of Health System Audit

Derek Robinson leads the health system audit team, which provides an independent viewpoint on governance, risk management and internal controls for Duke Health: the three Duke hospitals, Duke Primary Care, the Private Diagnostic Clinic, and other health-related entities, which collectively serve over 1.3 million annual patient encounters. Derek and the team consult with operational and administrative leaders to identify areas of potential financial, operational and institutional risk, recommend improvements, and monitor processes to promote a safe and reliable experience for all patients.

Derek joined Duke in 2016 after a fifteen-year career in both healthcare and financial services. Prior to his role at Duke, he was a senior manager in the healthcare provider practice at Deloitte Consulting LLP, working with leading hospitals and health systems across the nation to implement large-scale clinical transformation programs and navigate the shift from volume- to value-based care. He spent the early part of his career as a consultant and operations leader in the banking industry.

Derek holds a B.A. from the University of Southern California and an M.B.A. from the Johnson School at Cornell University, where he was a Roy H. Park Leadership Fellow. He is an active member of the Healthcare Financial Management Association and the Association of Healthcare Internal Auditors.
